ShopBOSS

GAIN VISIBILITY AND CONTROL OF YOUR SCHEDULE

Eliminate the bottlenecks in your shop. Make quality parts at a profit. Ship to deliver on time, and keep your customers coming back with ShopBOSS Advanced Scheduler.

ShopBOSS puts you in control by seamlessly integrating with JobBOSS® Job Control

ShopBOSS will reschedule jobs and operations plus alert you to any exceptions that need to be acted upon. You gain the ability to keep your work centers utilized to their most efficient capacity directly and positively impacting your bottom line.

ShopBOSS drives a true production plan

For many job shops, the luxury of having cash tied up in inventory and the additional carrying cost of that inventory is just not reality.

ShopBOSS integrates seamlessly with material planning to give you the flexibility, on an order by order basis, to indicate whether the scheduling is driven by:

- The production plan -for material due dates
- Material due dates - for a true production plan

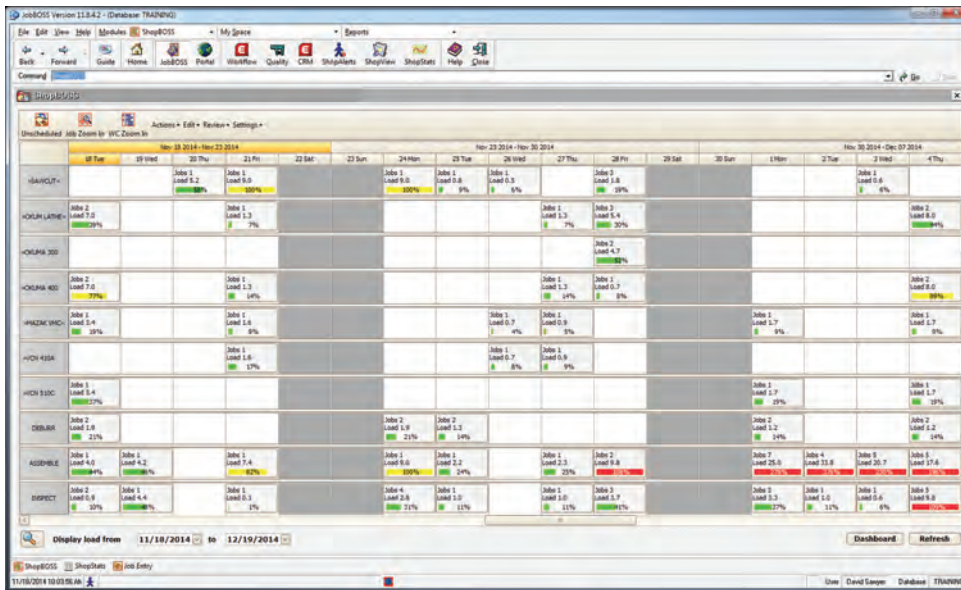

ShopBOSS provides visibility into scheduling and planning issues and alerts you to issues in real-time, giving you the opportunity to react quickly and easily to them.

As a job shop, you are primarily selling time

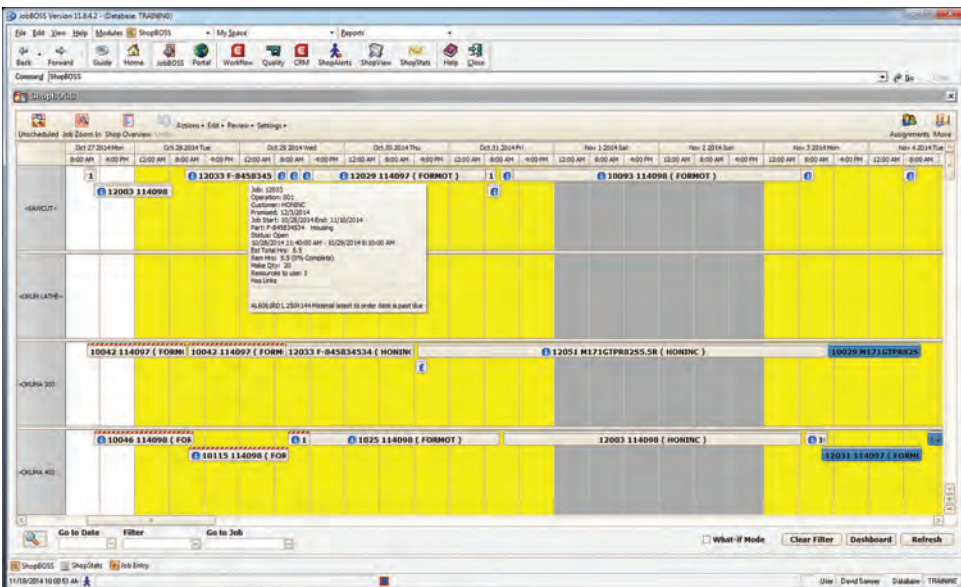

One key benefit of ShopBOSS is that you can see, in real-time, the effect of either adding time (by working weekends, extended shifts, etc.) or decreasing capacity (to allow for preventive or reactive machine maintenance). Another benefit is the ability to quickly and easily add or remove employees from the schedule and see the effect immediately.

Job	Customer	Part	Description	Promised	Start	End	Comp Qty	Status	Rem Hrs
10034	CATINC	A61843	Arm Screw	11/26/2014	10/27/2014	12/3/2014	0	Active	108.55
10077	HONINC	C254099-B	Corner Bracket - L...	12/1/2014	10/27/2014	11/17/2014	0	Active	12.1
12033	HONINC	F-845834534	Housing	12/3/2014	10/28/2014	11/7/2014	0	Active	28.16
10089	FORMOT	114098	6" Roller Shaft	12/4/2014	10/28/2014	11/11/2014	0	Active	8.47

- > ShopBOSS Dashboard with FirmZone allows you to easily define and lock your short-term planning horizon, producing even more complete scheduling control.

> ShopBOSS is a foundation for maximizing planning with a real-time picture of your shop.

> Maximize your scheduling and production planning by drilling down to a minute by-minute or hour-by-hour view of your production schedule.

Drive efficiencies throughout the shop floor with visibility into the production schedule and employee availability. ShopBOSS allows shop foremen and supervisors to review the production plan and actually assign work based on the combination of the schedule and skill set of the employee.

When the employee knows exactly which part they need to work on next, time wasted walking back and forth from the shop to the office to ask the shop foreman which job to start next is significantly reduced or even eliminated.

ShopBOSS is a visual tool to assist you in making critical decisions, even while your customers are on the phone.

Imagine having your best customer on the phone with an order or a change to an order and being able to:

- View your current workload versus capacity
- Determine at a glance where you have room to insert more work, where you are nearing capacity, and where the current bottlenecks in the shop are
- See the impact on other jobs in your shop

Additionally, you can look out a week or two weeks, and see exactly where you need to allocate resources, work overtime, or make other adjustments because the sales staff has sold more capacity than your shop is able to complete within the regular schedule.

Eliminate the bottlenecks in your shop. Make quality parts at a profit. Ship to deliver on time, and keep your customers coming back with ShopBOSS Advanced Scheduler.
